## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, 25-37, and 48-61, drawn to a method for permitting a first user of a first terminal to distribute contents stored in the first terminal to a second user of a second terminal to permit the second user to inspect and purchase the content if desired.
  - II. Claims 15-24 and 38-47, drawn to a method for managing a super-distribution server wherein tracking the status & account activity, managing DRM deployment, and aggregating charges & usage records of community members.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as a method for managing a super-distribution server wherein tracking the status & account activity, managing DRM deployment, and aggregating charges & usage records of community members. See MPEP § 806.05(d).

Art Unit: 2685

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter and different searches are required for each group.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
